Experiment - 2

AIM: To study the packet Installing and User Interface overview

Installing packet Tracer

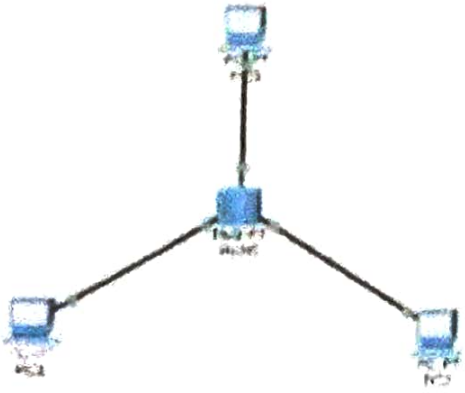

To download packet Tracer go to https://www.com and log in with your Cisco Networking Academy Credential. click on the packet Tracer.

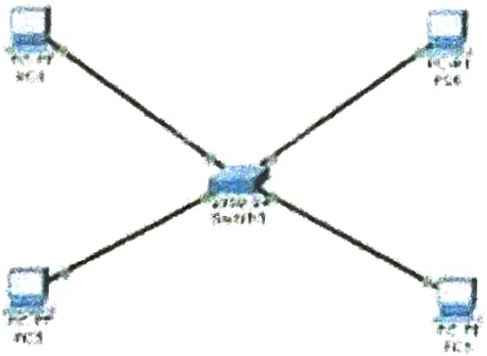

Windows:
Installation in window is pretty simple and straight forward. the set comes in a single file named packettracer_setup601.exe.

Linux:
Linux users with an Ubuntu Debain distribution should download the file of Ubuntu and those using fedora / Redhat / centos download the file of fedora

User Interface overview:

1. Menu bar
2. Main tool bar.
3. Logical / physical workspace tabs.
4) Workspace
5. Common tool bar.
6. Real-time / Simulation tabs
7. Network component box.
8. User created packet box.

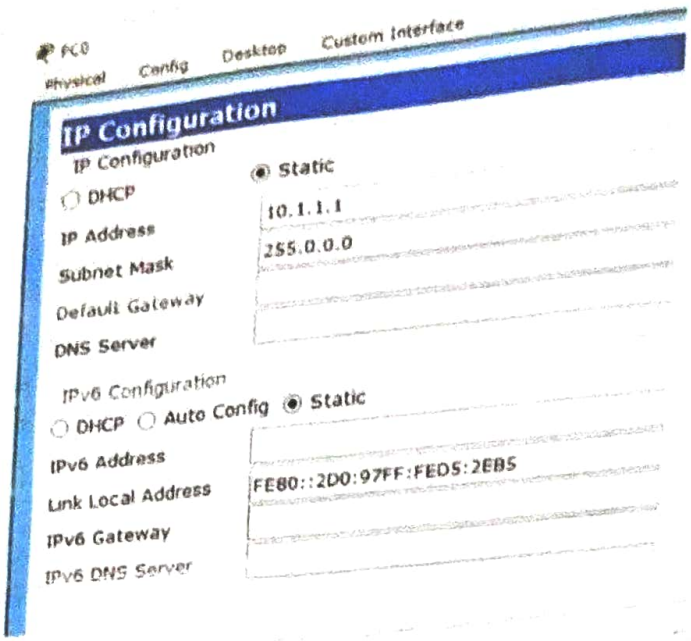

d) Analayse the behavior of network device using CISCO PACKET TRACER Simulator.

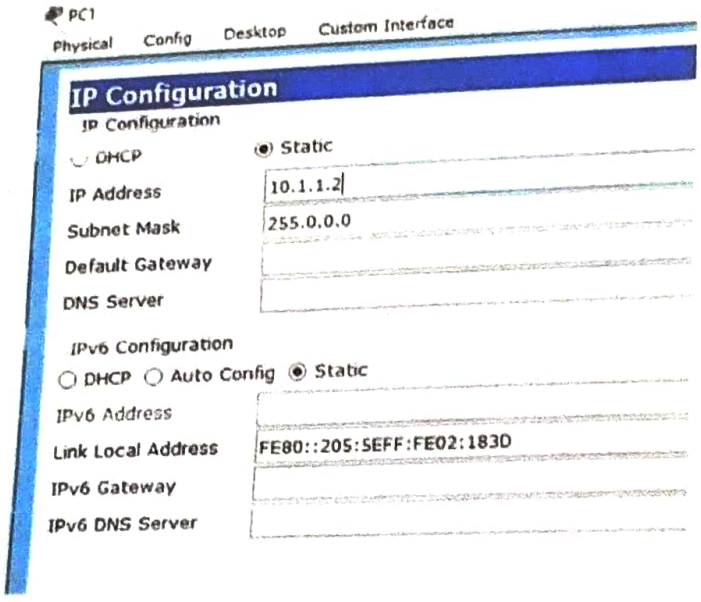

1. From the network component box click and drag below components
   a) 4 Generic PCs and one HUB
   b) 4 Generic pcs and One switch

2. click connections
a) click on copper Straight through cable.
b) select of the Pc and connect it to HUB using the CABLE. the link LED should glow in green
c) Similary connect 4 PC to the switch using copper straight-through cable.

3. click on the Pc's connect to hub go the Desktop tab click on IP configuration and enter an IP address and subnet mask the default gateway and DNS server information is not needed as there are only two end devices in the network

4) Observe the flow of PDU from Source pc to Destination PC by seleting the Realtime mode of Simulation
